

# PHILIP NOYED

WWW.PHILIPNOYED.COM

"Technological change in the last decade has propelled my art forward in many ways. Photographs mounted to acrylic and made into mobiles. LED lights illuminating my images as 3D acrylic sculptures. New materials like the dichroic film I used on "Arising: Flying Rainbow Colors" and rainbow vinyl film I used for installations at the MSP airport. Creating paintings in 3D (when viewed through chromatic glasses)—using Virtual Reality (VR) to bring people in the 3D painting as a 20'D x 15'H Virtual Reality (VR) light installation and using light as an architectural element by building with clear acrylic tubes and LED lights to create Rainbow Pyramids as immersive art experiences and using mirrors to allow people to be in the art. Improvements in the photo and video editing software to easily amplify and transform into new art. Computer-driven routers to cut acrylic to exact specifications. The science of light and color effects on the brain to reduce stress and activate the brain in positive ways. The expanding knowledge of the power of art to heal."

## ArtTour International presents: The Artist of the year Award to Philip Noyed

By Viviana Puella

ArtTour International is proud to announce the artist of the year 2022 and the modalities of the award presentation. Philip Noyed will receive the award at the ArtTour International Magazine's ATIM Masters Awards in June 2022 in New York.

ArtTour International Magazine (ATIM) Masters Awards will host over sixty master artists from all over the world to receive and celebrate their awards. In addition to the artist of the Year award, Phillip Noyed will also be honored as one of ATIM's Top 60 Master Artists of the Year 2022.

Phillip Noyed's nomination for this award is well-deserved, as he has earned his place in the art world as an innovative multimedia artist. The Minneapolis-based artist is best known for his luminous geometric illumination photographs, LED installations, videos, 3D and VR creations, and mixed-media installations. Noyed's art pieces feature the use of creative technology through which he has revolutionized how people view art today. His recognition in the art world can be attributed to the level

of detail that goes into his creations. Critics, audiences, and art community members have described his works as visually captivating. Rightfully, the fusion of geometric elements and lighting is often present in the mesmerizing results his finished works showcase.

Philip uses light, color, and sound to create immersive, transformational art experiences. His art represents the quintessential contemporary art movement using innovative technologies that change the way art is experienced today.

Color, light, and sound are all harmonic frequencies that affect people emotionally and physiologically. Philip uses these ideas to create healing art accessible to people of all ages and backgrounds.

Philip's most recent creation NEO ART SPACE is a wow-inspiring immersive Virtual Reality (VR) art experience. Traveling through space and time, you emerge in a new universe as an explorer of planets, stars, galaxies, and dazzling moving colorful light art. You explore over thirty experiences orchestrated with gorgeous music to help you move from everyday 3D experience to a transcendent 5D consciousness.

You can create your own experience via teleporting wherever you want to go on pathways through glowing light caves, into planets, through vibrantly alive forests, inside zinging energy fields, or out into a space observatory to see an eclipse. The array of experiences and the levels you can go to are as boundless as the universe you are in. You can even create your very own interactive geometric art.

Sharing the experience with others only amplifies its effect. You can meet family and friends inside and experience the sense of awe and wonder in the Neo Art Space VR together, making unforgettable memories as unique as the environment you are in.

"Aurora Space View - Neo Art Space VR"

"Rainbow Sculpture Cave - Neo Art Space VR"

"Green Diamond Cave - Neo Art Space VR"

"Kinetic Color Orb - Neo Art Space VR"

"Inflection Point"

"Aurora Borealis and Star of the North"

"Geometric Illumination Installation"

Philip and his team are actively developing the Neo Art Space VR experience for a release in a few months. You can follow the progress and enjoy magical images, animated graphics, and videos at [NeoArtSpace.com](https://www.neoartspace.com), [https://www.instagram.com/neo\\_art\\_space/](https://www.instagram.com/neo_art_space/).

For over 15 years, ArtTour International has been committed to shedding the spotlight on artists and exposing them to the eyes of art lovers and collectors globally. So we're proud to present our artist of the year 2022 and honor his innovative work.

ArtTour International operates on the philosophy of using art to raise human consciousness and global awareness of important societal topics. And over the next few years, we will continue being the torch holder and leading voice for artists globally.

"Leap of Joy"

"Heart of the Sunrise and Rainbow Colors Arising"

The RAINBOW PYRAMID light experience goes through the seven colors of the Rainbow/Chakras while music plays that corresponds to each of the frequencies of the chakras – from the base of red to the apex of the purple crown chakra. Thus, the sacred geometric dynamics of the pyramid, combined with color and sound, help elevate the viewer's frequencies while bringing a sense of joy, peace, and being attuned.
