NEO ART SPACE

Award-winning multimedia artist Philip Noyed is poised to leave his audiences feeling awe and a sense of wonder as he introduces Neo Art Space VR art adventure.

Neo Art Space is the first galaxy of immersive VR art and features the most cutting-edge immersive light art anyone has ever seen.

Neo Art Space contains over 30 beautiful light experiences - bioluminescent caves, radiantly colorful forests, electric energy fields, aurora borealis skies and geometric light spaces.

You walk through a black hole and emerge on a walkway amidst planets, stars and super novas. You enter into planets and light fields alive with light in motion.

The Neo Art Space is designed to be transformative and healing, meditative and joyful.

Neo Art Space is vast in scale. Visitors explore over 100,000 square feet and over 10 stories high art experience - creating their own experience by teleporting along pathways, jumping through portals to new experiences, space walking or even flying.

Multiple friends - from anywhere in the world - can enjoy this adventure together.

Neo Art Space VR is being developed for release in 2022. A demonstration version is available for PC VR that you can request - Philip can join you in Neo Art Space and show you around! Or, you can access a PC Desktop version demo.

Keep up to date with Neo Art Space events at NeoArtSpace.com where you can sign up for an email newsletter, or social sites. You can join the community at our Neo Art Space Discord site.

NEO ART SPACE VR

Sharing the experience with others only amplifies its effect. You can meet family and friends inside and experience the awe and wonder in the Neo Art Space VR together, making unforgettable memories that are as unique as the art space you are in.

You'll be transported to spectacular experiences that are out of this world. Truly.

{6

Traveling through time and space, you emerge in a new galaxy as an explorer of planets, stars and dazzling moving colorful light art experiences. You explore over thirty experiences orchestrated with ethereal music to help you move from everyday 3D experience to a transcendent 5D consciousness.

Neo Art Space Intro Video

You can create your own experience via teleporting wherever you want to go on pathways through glowing light caves, into planets, through radiant forests, inside zinging energy fields, or watch an eclipse from a space observation zone. The array of experience are as boundless as the universe you are in. You can even create your own interactive geometric art.

ABOUT

PHILIP NOYED

Philip Noyed is an innovative multimedia artist living and working in Minneapolis, Minnesota. Philip creates virtual reality (VR) art, abstract photographs, geometric illumination light sculptures, kinetic mobiles, videos, 3D paintings and mixed-media public art installations.

His artwork represents the quintessential contemporary art movement using cutting-edge creative technology that is changing the way art is experienced today. Bold colors, light, and high-voltage geometric compositions characterize the variety of artworks he creates.

Through NeoArt Space, Philip wants people to revolutionize their idea of experiencing art. Instead of looking at curated art on walls or pedestals, Philip wants people to be fully immersed in the art and experience it with all their senses. People navigate freely to create their own unique experience... from rapidly hopping from portal to portal to simply meditating in a gorgeous light space.

Philip has shown his art nationally and internationally. He has won many awards both for his art and for Creative Direction. His artwork has been featured in national and international magazines and he has been featured on TV, Radio and Podcasts. He is a speaker on art and technology, the healing power of art and branding.

“ I begin by photographing subjects, usually my own oil paintings, at slow shutter speeds, transforming hard-edged, dimensional shapes into vibrant light-emitting compositions. ”

“ I also skew, distort, cut, replicate and merge the sampled images, creating new kaleidoscopic shapes. ”

ART

PUBLIC

{ 12

Philip Noyed has been commissioned to create public art installations that activate and transform spaces. He uses LED lights to illuminate large-scale images – some sixty feet long! He invented kinetic 4-sided diamonds to create colorful mobiles. He uses innovative materials including translucent photo prints, rainbow vinyl and dichroic film.

ART & HEALING

Philip Noyed is on the forefront of exploring the healing power of art experiences both in VR and using LED lights, sound and sacred geometry. Philip uses innovative light and sound system technology to create installations that are both awesome art experiences and healing spaces.

In art, color is often only seen as being merely representational or expressive. In fact, color, light and sound are all frequency waves that effect people psychologically and physiologically. There are many scientific studies that demonstrate color and sound waves provide healing therapy. Philip uses this understanding to create healing spaces.

THE RAINBOW PYRAMID

The sacred geometric form of the Rainbow Pyramid acts both as a transmitter and a receiver; it also has a center point balance of North, South, East, West, Earth and the Heavens. The mirrored floor allows visitors to see the pyramid below as well as above creating a diamond space in the very center perfect for centering and meditation.

The LED lights move through all seven colors of the Rainbow/Chakras while music plays that corresponds to each of the frequencies of the colors. The overall effect of the pyramid, colors and music is to create a sense of peaceful alignment of all the chakras.

The “*Geometric Illumination*” series is based on a radical reinterpretation of photography that transforms the photograph from a “*window on the world*” to geometric light sculptures. The original images are digitally amplified and used as building blocks to transform into new, unique images and mounted on acrylic to create sculptural objects.

The “*Geometric Illumination*” series explores light, color, abstract image design, form and space. The artworks are wall-mounted or free standing. The use of LED lights behind images creates brilliant colors and a glowing ambiance. The kinetic “*Geometric Mobiles*” use single or multiple diamonds with translucent images or dichroic film to activate space.

— GEOMETRIC ILLUMINATIONS —

Noyed's background as a ceramic artist and also an expressionist painter have imbued his artwork with dimension and movement. In addition to skillful application of design elements, color has always been a constant source of inspiration for the artist.

His "*Geometric Illuminations*" series demonstrate the culmination of his exploration of light, color and space. Accurately named, they successfully embrace the essence of geometric abstract painting and produce a light-filled ambiance.
